SIPOC Diagram

Agenda

1. SIPOS Diagram: What is it ?
2. SIPOC Diagram purpose and benefits ?
3. Construction
4. Takeaways

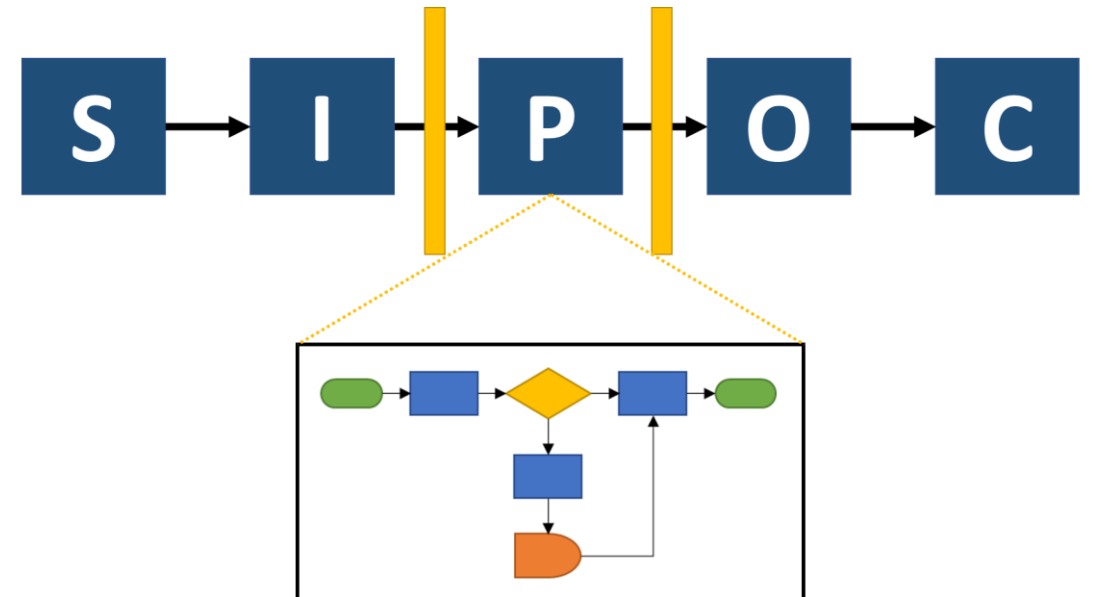

Introduction

What is it ?

Tool used to identify all **relevant elements** of a process improvement project **before** work begins.

It helps to **define a complex project** that we may not have **scoped** well or is **unclear**.

Introduction

What is it ?

SIPOC analysis can be used **before drawing a process map or a flowchart** as it helps gather relevant information about the process

SIPOC Diagram

Purpose and Benefits:

Everyone takes inputs from suppliers, adds value through their processing steps, and provides an output or outputs that, at a minimum, **meet the customer's needs** (CTQs).

A SIPOC diagram **clarifies the high-level business requirements** in a language other departments can understand and provide the high-level business requirement **information needed by specific teams.**

SIPOC Diagram

Construction:

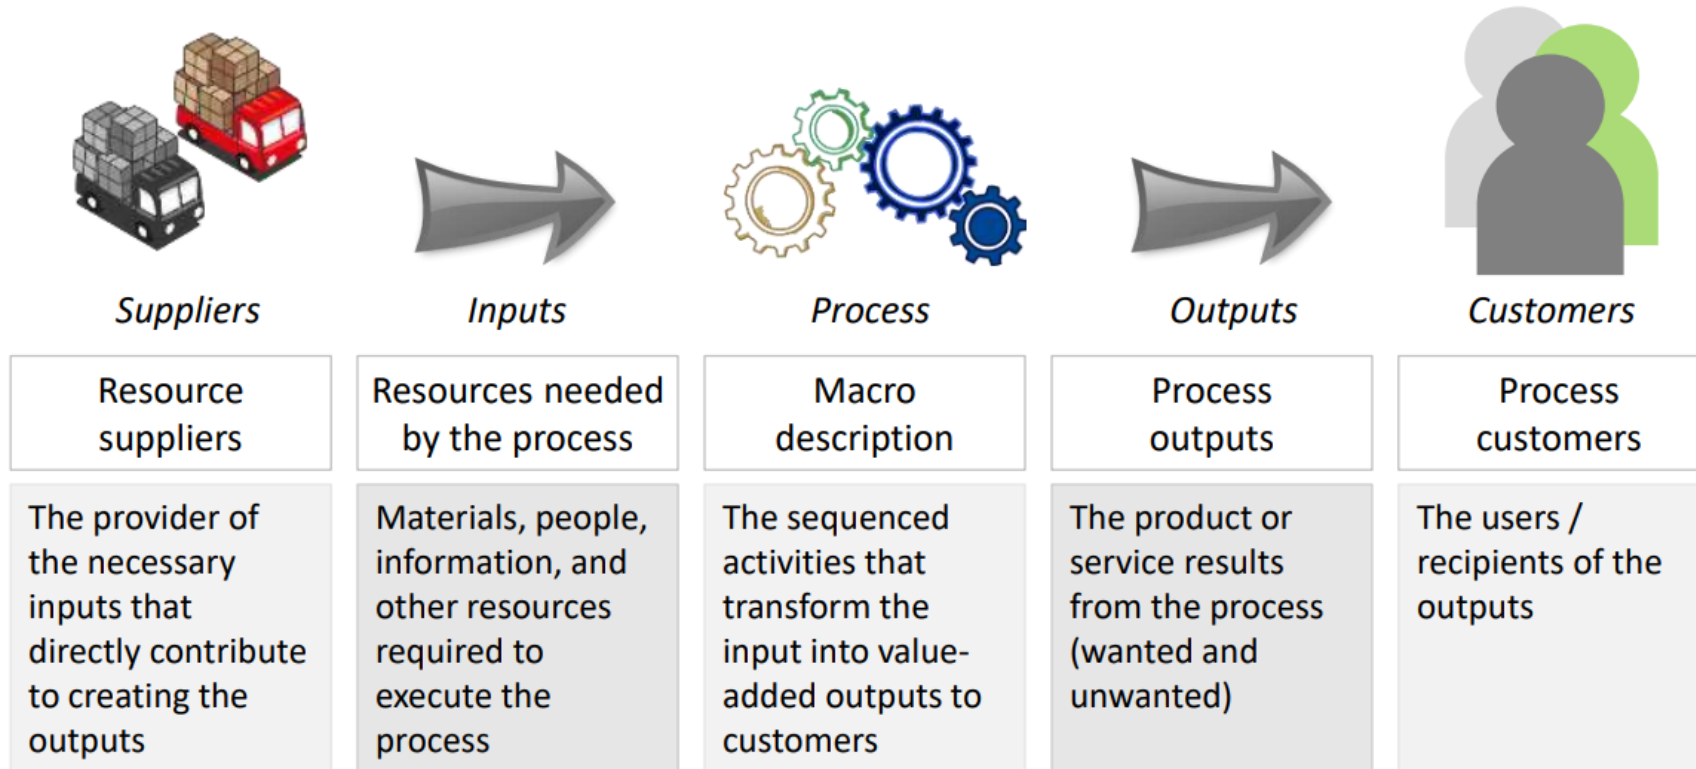

The high-level process requirements:

- **Outputs:** What information, data, report, eligibility status, etc., comes out of this activity or is produced because of this activity?
- **Customers:** Who or what receives whatever comes out of this activity?
- **Inputs:** What data, supplies, system, tools, etc., are required for this activity, or who is needed to perform the action?
- **Suppliers:** Who or what functional organization, system, report, database, etc., supplies or provides whatever is needed as an input to this activity?

| Supplier | Input (use nouns) | Process (use verbs) | Output (use nouns) | Customer |
|--|---|---|---|---|
| External Customer, POS (Sales staff, .com, Contact center) | Customer purchase and delivery details | Capture Order (accurate information, requested delivery time) | Delivery instructions / requirements | Central Delivery Office (CDO) and Central Delivery Terminal (CDT) |
| Customer | Delivery instructions / requirements | Schedule Delivery | Scheduled 4 hour delivery window | Delivery Scheduler |
| Delivery Scheduler | Scheduler 4 hour delivery window Staff Schedule | Optimize and narrow delivery schedule | Daily schedule | Delivery Managers, Drivers and Riders |
| Delivery Scheduler | Daily schedule | Communicate updated / narrowed delivery window to customer | Customer expectations of arrival and on-site duration | External Customer |
| Delivery Scheduler | Daily schedule Driver and Rider Assignments | Perform delivery | Delivered Item(s), On-time performance | External Customer |

| Suppliers | Inputs | Process Steps | Outputs | Customers |
|---------------------------------|---|---------------------------------|---------------------------------|----------------------|
| Planning | MPS / Schedule | Create Print Job | Phat PR label files | QA / Approval |
| Replenishment Analysts | Slack notification, Phat | Label Approval | Approval | Printing Room |
| Warehouse | Material (labels, pouches) Labeling machines | Print labels + Pouches labeling | Labels printed; pouches labeled | Pack Room 5 |
| Pack room, Vault, Printing room | Biomass, labeled pouches, materials | Run Production PR | Finished goods | Shipping / Warehouse |
| ACM, ES, Phat | PR materials consumption | Close PR (ACM and ES forms) | PR completion and transfer | Shipping |
| ACM, ES | PR completion information | Batch release (QA) | FG released | Logistics |
| | | | | |

TOOLBOX

SIPOC
Diagram
Template

Takeaways

- This model applies to both **product** and **service**.
- Construct the diagram to reflect how the process currently operates ("**As-Is**"), not how it should operate ("**To-Be**").
- Keep a "**high-level**" process map restricted to roughly **four to eight** key steps.

Thank You
