

Process Walk

TPM

HANDS ON

TPM

Instructions:

1. Visit the production area/line. Choose one equipment or machine.
2. Apply the 7 Steps of Autonomous Maintenance.
 - a) Confirm operator knowledge.
 - b) Cleaning and inspection if performed,
 - c) How a better practice can you implement to have the equipment in peak conditions?
 - d) Define a standard: What to clean, how, how often
 - e) How to implement a frequent inspection
 - f) Can you implement a visual management to facilitate operator to follow a standard?
 - g) What can be done to trigger a continuous improvement mindset?
